Introducing The FlexiSnake Hair Clog Tool

Dear store owner/manager,

Your customers are discovering there is a “**better way to clean their drain**” and would like to purchase locally. We’ll make it easy to start selling FlexiSnake. No minimum order, free shipping on your first order and we’ll bill you net 30. Just drop us an email or call with quantity of each item. These items move fast from the recommended, free floor display (see picture at <http://www.flexisnake.com/displays.php>). Everybody gets slow bathroom drains!

FlexiSnake utilizes a **patent-pending, hook-and-loop pad** to snag and retrieve the most stubborn hair clogs, and **relief is immediate!** Just slide FlexiSnake down along the drain pop-up stopper, twist, and up comes the hair, and down goes the water! There’s no reason to just “put up” with slow drains any longer.

There are 2 sizes of FlexiSnake to choose from. We recommend first time buyers select the **Combo 2-pak** and see what works best for their drains.

Both sizes are approximately 25” in length but come coiled in a pocket size that will conveniently fit in a drawer or toolbox. They are disposable or reusable. Can be cleaned with soap and an old toothbrush. Both sizes slide past sink or tub pop-up stoppers.

The **FlexiSnake Standard size** provides maximum hair-clog removing power. Works great for tough bathtub hair clogs.

For smaller drain openings with fixed screens or grids, use the **FlexiSnake Jr.** The Junior is a lighter-duty tool that goes where most other drain snakes can’t, with a narrower hair-snagging pad. FlexiSnake Jr is also ideal for bathroom sink drains.

Product	Sugg Retail	Wholesale Cost (in clamshell)	UPC
